A unique range of catheters designed to administer fluids at high flow rates.

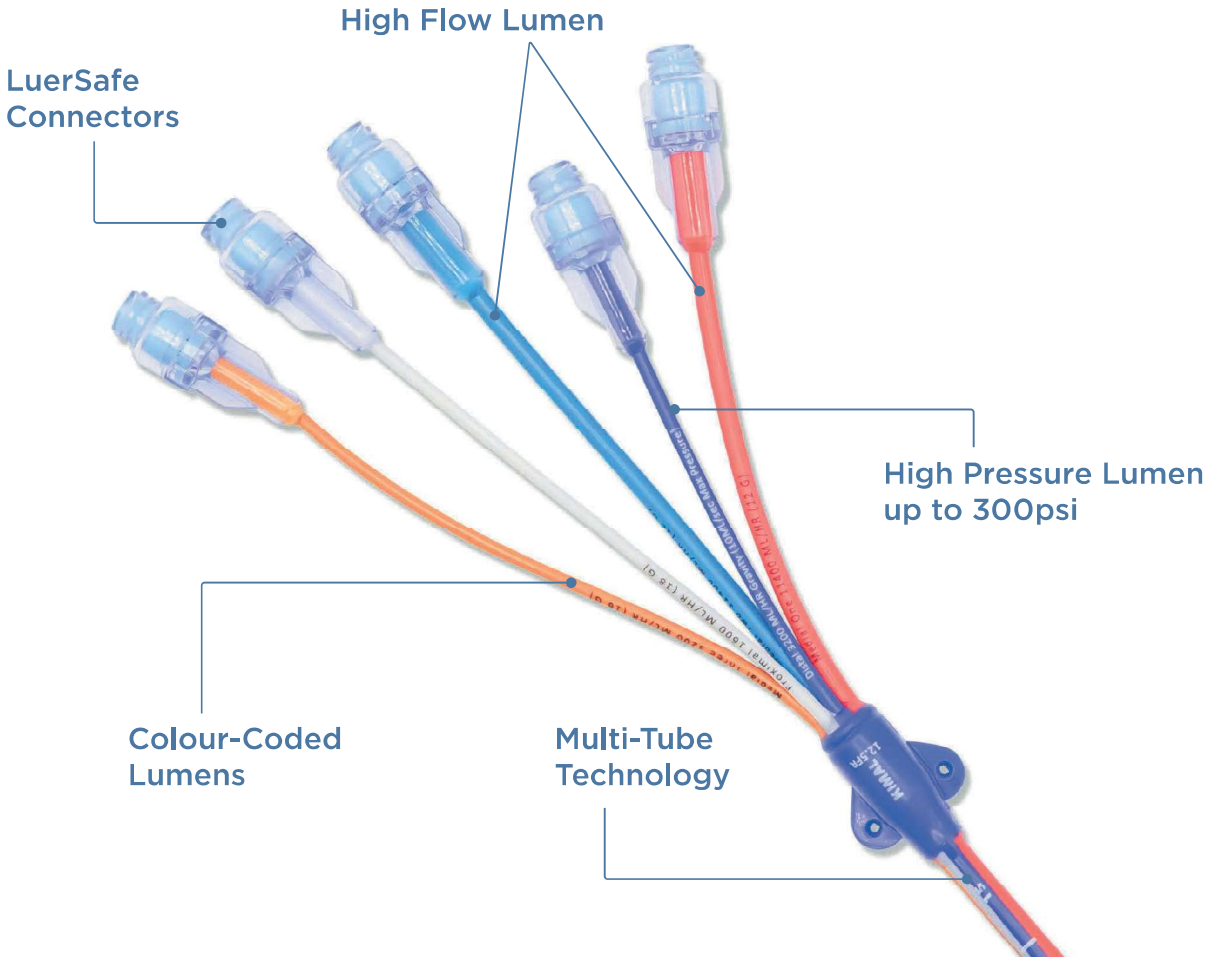

The unique Multi-Tube technology incorporates a large bore lumen, that can deliver high flow rates whilst maintaining all of the benefits of an Altius CVC.

The Range

Adult sizes available in 3 or 5 lumen configurations.

Perfectly round lumens
in **every configuration**

Kimal's range of catheters provide unique features to protect your patients. Combine these innovative catheters with our range of comprehensive procedure packs for a complete procedural solution that can help improve patient safety.

You've chosen the catheter, now support it with the procedure pack. Kimal catheters can be supplied alongside your chosen **Line Insertion Packs** for improved aseptic practice.

Choose your Line Insertion Pack:

Basic CVC Insertion Pack

Intermediate CVC Insertion Pack

Comprehensive Insertion Pack

Or customise it to your own specifications:

You can customise your pack to comply with your local IV Policy and best practice insertion guidelines.

Whether that's a maximum barrier length drape, an ultrasound probe cover, or safer sharps, we've got you covered.

Contact your Kimal Representative for more information.
