Altius ProActiv+ is a chlorhexidine free, non-eluting, covalently bonded antimicrobial CVC to protect the patient for the duration of use.

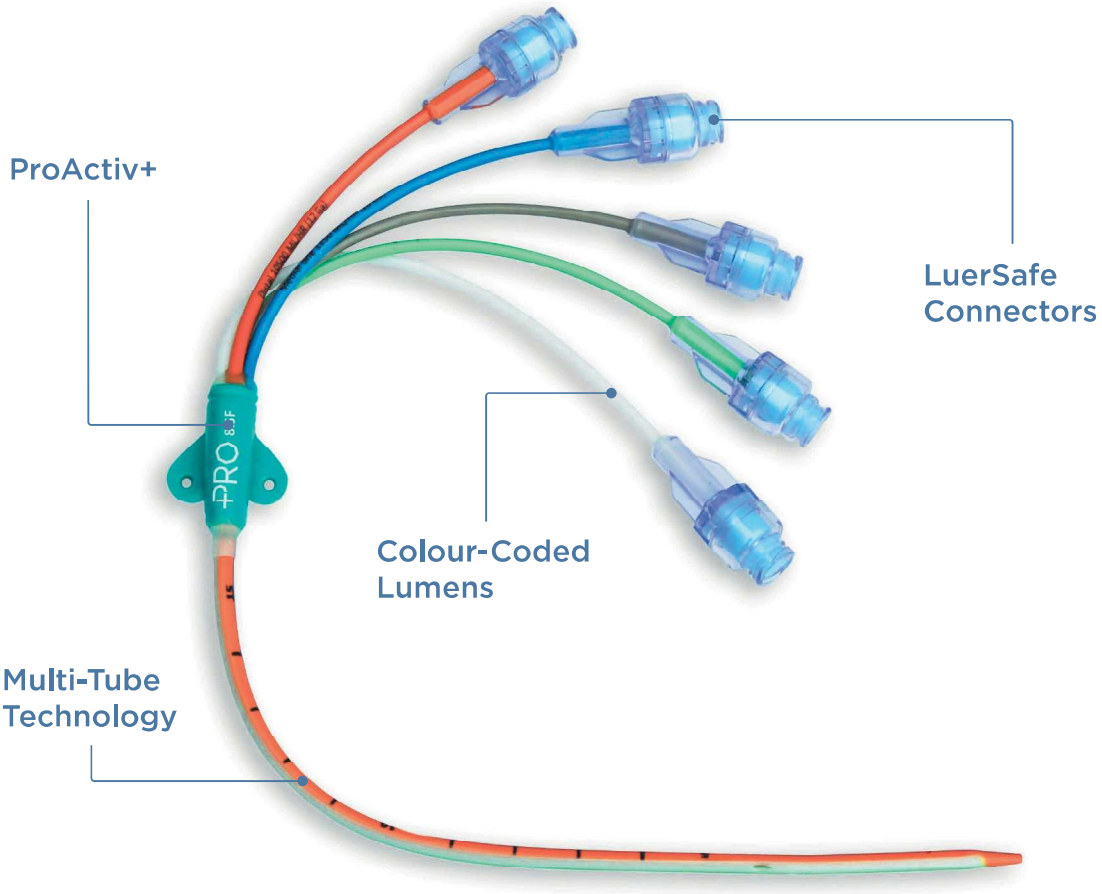

Combining a non-thrombogenic (PEG) with PHMB (an antimicrobial), Altius ProActiv+ provides antimicrobial effectiveness to protect your patient for the duration of use.

The Range

Adult sizes available in 1 to 5 and 7 lumen configurations.

Perfectly round lumens
in **every configuration**

Why choose Altius ProActiv+?

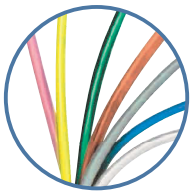

ProActiv+
A chlorhexidine free, non-eluting, covalently bonded antimicrobial to protect your patient for the duration of use.

Integrated LuerSafe Connectors
LuerSafe needleless valves automatically maintain a closed system when not in use - eliminating the need to clamp or unclamp lines, reducing unintended air ingress.

Multi-Tube Technology
Perfectly round lumens to deliver higher flows. Up to 7 lumen and 9 French.

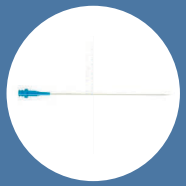

Colour-Coded Lumens
For easy identification when determining which drug is infused through which lumen.

INSERTION KIT
The insertion kit has been designed to reduce risks during insertion.

Echogenic Needle: Easy visualisation under ultrasound to prevent posterior wall puncture.

Hydrophilic Dilator: For smooth dilation to prevent vessel trauma.

Altius Guidewire Dispenser: Ergonomic design to facilitate kink-resistant nitinol guidewire advancement, even with wet gloves.
